Math 313: Probability and Statistics
Fall 2012

Class Meets: SC 345, MWF 2:30–3:35

Instructor: Neil Martinsen-Burrell, Science Center 363, 319-352-8420, nmb@wartburg.edu

Class Web Page: http://mcsp.wartburg.edu/nmb/math313

Office Hours: MWF 12–1

Prerequisites: MA 202 or MA 252

Catalog Description: Study of theoretical probability distributions that are models of empirical distributions of data generated through counts or measurements. Elementary probability and counting techniques, such as permutations and combinations. Continuous random variables modeling waiting time, lifetimes of components, masses of particles.

Objectives: Upon completion of this course, students should

1. be able to reason and solve problems using a system of numeric or symbolic concepts to generate a solution to problems encountered throughout a variety of real world applications.

2. become skilled in probability, distribution theory, point and interval estimation, hypothesis testing, and regression.

3. recognize errors, fallacies, or distortions in the presentation of logical arguments, problem solutions, or displays of quantitative information.

4. make connections between their field of interest and statistics.

Homework: Homework will be due weekly on Monday and assignments will be given in class and posted to the course web page. You are strongly encouraged to try the week’s homework before Friday so that you can ask questions in class or in office hours before the weekend. If you would like to see me outside of office hours, I cannot always be available so please make an appointment so that we are able to connect.

Collaboration is an important mathematical skill, particularly in statistics where work often crosses disciplinary lines, so collaboration on homework is allowed and encouraged. However copying from another person is prohibited in accordance with the Honor Code (see below). Think of your classmates as reference materials for your homework, and remember to cite your references: “I consulted Daffy Duck on the above problem.”
Exams: There will be two exams, one in the middle of the semester and one at the end of the semester. The exams will be individual take-home, open-book exams.

Projects: There will be a few projects during the semester where you will work in groups to study and present a topic in probability and statistics. One of these projects will be a final project where your group will study one topic deeply over the second half of the semester. You will write a report about what you have learned, due on the day of the final exam. Your group will also present a small portion of what you have learned in class during the last week of the semester.

Grading:

- Homework 25%
- Exam 1 25%
- Exam 2 25%
- Projects 25%

Grading will be relative to the performance of the rest of the class, with the exception that a 90% will guarantee you at least an A-, 80% a B-, 70% a C- and 60% a D.

Academic Honesty: By attending Wartburg College, students pledge their dedication to the Honor Code:

As a matter of personal commitment, students, faculty, and staff of Wartburg College are expected to demonstrate three simple principles:

1. All work submitted be your own
2. When using the work or ideas of others, including fellow students, give full credit through accurate citations.
3. If you are uncertain about the ground rules on a particular assignment, ask for clarification.
4. Maintain academic honesty both on examinations and class assignments.

All are responsible for abiding by these guidelines and opposing academic dishonesty by reporting any act that goes against these guidelines.

Any violations of this Honor Code will result in consequences between a failing grade on the assignment and a failing grade for the course.

Special Needs: Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, and the ADA Amendment Act of 2008 provides protection from illegal discrimination for qualified individuals with disabilities. Students requesting academic accommodations due to disabilities must arrange for such accommodations by contacting Kelly Beck, Pathways Academic Success Associate. She can be reached at the Pathways Office, (319) 352-8230 or by e-mail kelly.beck@wartburg.edu. Accommodations should be requested prior to affected assignment due dates.
