

CS 230 Case Study: Selecting a Language

You must select a programming language for your case study from the following list:

APL
BASIC
C#
C++
Clojure
COBOL
Dart
Elm
Erlang
F#
Flow-matic
FORTRAN
Go
Groovy
Haskell
Java
JavaScript
Julia
Kotlin
LISP
Lua
Matlab (Octave)
ML
Objective-C
Perl
PHP
Prolog
R
Ruby
Rust
Scala
Swift
TCL/TK
Typescript

Guidelines

1. You do your case study individually, or as a team of 2.
2. You **MUST** be able to install the language somewhere so that you can try it out.
3. Each student/pair must have a different language.
